FLAT BRACKET DISPLAY MOUNT 49" TO 80"

The FB49 is designed to mount up to 49" to 80" displays just 14mm from the wall. The fixed frame design is ultra slim, yet it is able to mount screens weighing up to 70kg (154lbs) with ease. The mounting system is compatible with the VESA 800 x 500 system, making the mount compatible with a majority of medium sized displays.

The built in on wall levelling system enables the mount to be installed perfectly level without the need to adjust the position of the mount on the wall after initial fitting. The intuitive hook on screen mounting system can be attached and removed from the mount for simple servicing and diagnostic tests.

The included security screw keeps the display safely mounted during events and in public spaces.

SPECIFICATION	
Screen Sizes	49" to 80"
Max. Screen Weight	70kg (154lbs)
VESA	800 x 500
Colour	Black
