

DROP SOME BEATS

Music from above

Gallo Acoustics DROPLET pendant speakers are the antidote to bland boxy speakers and faceless in-ceiling varieties. The solution to the challenges of open architecture and high ceilings, and a welcome injection of personality and colour for projects that demand real hi-fi quality audio in a design-focussed, decor-friendly form.

At home in a wide variety of environments from lounges and dining rooms, to kitchens and home cinemas, DROPLET has the audio credentials to

back-up its obvious aesthetic charms. Based upon our acclaimed 4" and 5" Micro and A'Diva spherical loudspeakers, DROPLET has true hi-fi pedigree and unrivalled clarity and dispersion.

Available in a choice of 11 stock colours and 9 different cable finishes, DROPLET opens up a world of interior design opportunities.

And for that special project our SPECTRUM bespoke colour service can match any colour, whether from the Pantone or RAL colour systems or swatch of wallpaper.
