

GALLO DROPLET LIGHT

SPEC

Light Source: CXM-6 COB LED

Colour Temperature: 2700K

Lumen Output: 568 lumens (Delivered) with lens and HCL

CRI Ra: ³ 90

Beam Angle – 32° Or 52°

Dimming: 1-10v, DALI, DMX, Wireless or phase (via a suitable dimmable driver).Supply:

1050mA Constant Current (10 Watts)

Materials / Finish: Black Anodised Aluminium and Steel

Weight: Micro 635g Adiva 975g includes 2m of cable

Maximum pendant drop from ceiling: 5m

DRIVERS:

1050mA (milliamp) constant current driver - this will always stay the same no matter how many light fittings you are using, the only thing that will change is the wattage.

Each light fitting is 10.5watts - we allow around 20% headroom so would round this to 12watts per light fitting.

You can have 1 driver per fitting which would need a 1050mA 12watt driver each.

Or run several light fittings in series from 1 driver, so 2 light fittings would require a 1050mA 24watt driver, 3 light fittings would need a 1050mA 36watt driver etc

The light fittings can be run on a lower mA constant current driver however the light output will be lower.

Correct polarity connection is essential and they must be wired in series.
